Jennifer

Can you enlighten me on who the Account Managers are for the top 3 accounts below?

Eric,

Thank you and I agree. Please forward this to the appropriate account managers to look into these three accounts and give them specific questions to address with the account owner. Are we going to raise thresholds for Family Medical respectively?

John

Based on the last 2 reports and recommendation of Joe Tomkiewicz we at the Division should focus on Independent Retail Accounts that show repeatedly and have OMP threshold issues. Other Accounts such as Hospitals, Alt Care or 1 time appearance Accounts are generally a spike in their buying. Based on this I recommend that the following Accounts get a closer look.

010052670 Safe Script Send Account Rep, for a visit
010038323 Community Drug Send Account Rep. for a visit
010051417 The Med. Shoppe Send Account Rep. for a visit
010045930 Woodman Pharm Diversion Group sending an Investigator
010060392 Family Med. Diversion Group Investigator has visited and cleared as legit

The top 3 Account Managers should ask questions about differences in Purchase History and 590 declarations, Changes in Business, etc and file an amended 590 and possibly a Request for

Threshold Review.
